Surveyed January 2001- February 2002 by Spencer Christian, Ralph Powers, Dave Shurtz, Ryan Shurtz, Bud Snedecor, Jeremy Jackson, Brent Hobbs, JR Rowley, Jake Snedecor, Rob Stilmar, Don Maxwell, Harrison Holden, Brandon Kowallis, Jon Jasper

INTERSTATE CAVE Total Surveyed Length: 1062.1 feet  
INTERSTATE CAVE Total Surveyed Depth: 200.2 feet  
ROADSIDE CAVE Total Surveyed length: 224.3 feet  
HIGHWAY CAVE Total Surveyed Length: 36.2 feet  
LEFT CAVE Total Surveyed Length: 51.1 feet

Interstate Cave is located directly off of the interstate. It is extremely dangerous to passing cars when someone enters this cave. Falling rocks can do serious damage to vehicles passing below and their passengers. A permit is required to enter these cave and it is suggested that no one enter Interstate or these other caves shown here unless they have a very good reason to go there. Projects that are beneficial to the caves, or projects that further our knowledge of this unique environment are considered good reasons to enter these caves. Please be considerate of the cave environment as you visit it's passages.
